Improved CiteScore methodology

CiteScore 2019 counts the citations received in 2016-2019 to articles, reviews, conference papers, book chapters and data papers published in 2016-2019, and divides this by the number of publications published in 2016-2019. [Learn more >](#)

Review of Education Research

Volume 90, Issue 1

Date: October 5th, 2020

Dear Dr. Ahmed A.S. Tabieh,

Thank you for submitting your manuscript "A Teaching model of polynomial functions & its learning experience of high school students according to the system approach" to the Journal of Review of Education Research. Following careful consideration by the journal's editorial board and a group of expert reviewers, I am pleased to inform you that the journal would like to publish your manuscript

The Review of Educational Research publishes critical, integrative reviews of research literature bearing on education. Such reviews should include conceptualizations, interpretations, and syntheses of literature and scholarly work in a field broadly relevant to education and educational research.

RER encourages the submission of research relevant to education from any discipline, such as reviews of research in psychology, sociology, history, philosophy, political science, economics, computer science, statistics, anthropology, and biology, provided that the review bears on educational issues.

RER does not publish original empirical research unless it is incorporated in a broader integrative review. RER will occasionally publish solicited, but carefully refereed, analytic reviews of special topics, particularly from disciplines infrequently represented.

Thank you for working with Review of Education Research in spreading knowledge across the globe.

Regards

karenmurphy
